A disorganized and poorly edited --and HUGE--jumble of --not college majors as much as lists of occupations. For example, one doesnot go to college to major in radiation technologist. Nor ultrasound technician, nor sheet metal worker. These are certificates,at most AA degrees in an occupation. Not majors. Within major headings, like Engineer, for example, sub-categories of engineering might appear as part of the engineering major, but you'll page allaround this catalogue

and if lucky, chance on sub-categories of engineering.

Could be a bit more organized, but I absolutely love this book! I saw it in stores for \$28 so this is a steal! The book did come with some creases, bent pages, and such, which is a downer because I like my books to come in perfect conditions, but I can work around it. You HAVE to get this book!! I am in highschool and this book helped me find my spot in life. Thank you so much!

Great resource - kids love paging through it picking occupations they might like or definitely do not want to do. Will hopefully help kids to narrow down what they want to study in college.

great reference book, but as others have said-bad organization-the course listings should be ALPHABETICAL-with better descriptions. All the courses listed need descriptions.

A thorough compendium of majors.

Very good book to have

Thx
