Activex Controls With Visual Basic 5.0

Synopsis

With the new capabilities of Visual Basic 5.0, programmers can now write their own ActiveX technology and shows how to build applications and distribute software over the Internet. Then, it shows the steps needed to take these controls to the market, from debugging and testing to licensing and distribution. Although written primarily for experienced Visual Basic programmers, additional audiences include experienced Visual C++ developers and Visual Basic Web page developers. The enclosed CD contains sampling of pre-developed working controls, a copy of Internet Explorer, utilities, help and more.
