Customer Reviews

I bought this book for my daughter who got a beautiful and sweet Border Collie mix from the Shelter. After about 6 months the dog had what appeared to be a seizure and continued to have them every 4 - 6 months. The book was informative and helped relieve a lot of her anxieties and gave her direction in what to do during and after a seizure. The book is helpful and provides natural pet care. It is not a complete work on the medical condition and lacks a great deal in providing all the medical solutions for this disorder. The book was promptly shipped in excellent condition.

This book answered all my questions on my pet's epilepsy and thanks to the advice inside, we were able to better manage our pet's condition.

For anyone who has endured the experience of watching a dog or cat have a seizure this book can be a godsend. Not only does it provide helpful holistic strategies that really work--it's a one of a kind book. Pet owners who have pets prone to seizures are often left helpless. They don't know who to turn to. In result, they end up scared, frustrated and believe conventional medicine is the only solution. It's not. My book which provides wonderful strategies from top holistic vets nationwide offers aid to any pet owner who wants help and is willing to try a healthful, alternative route to lower the risk of seizures. I believe that my research and doctors' words of wisdom and expertise can and will help their beloved pets. For those who have an open mind and are willing to explore the vast world of alternative medicine this book may be the solution you're looking for.

This is a great book but this pricing must be a typo. You can get this book for \$6.95 at Only Natural Pet's website online.
