Customer Reviews

If I reviewed it solely on how much I love the concept and the outcome of my projects, I would want to give it 10 stars if I could. I love the projects I have made. I started with the mouse head, it took me

only a few hours to complete. Then I moved on to the lion head, it took me a few weeks because I didn't work on it every hour of every day. They both turned out wonderful. The book has beautiful pictures and a great concept for crochet designs. Now the reason for the 3 stars. The book is written in UK terms, with no indication that they are UK terms. I figured it out by comparing the photos and the written pattern. If you are going to sell a product in the US, please make sure you indicate that the terms are not in US. Once I figured that out, I was good to go. It's easy to find the conversion online of what the UK term means in US terms if you do not already know. Next, like other reviewers have mentioned, the patterns are not concise and clear. I had to go between the written pattern and the diagram. If you do not know how to read crochet charts, this will be a tough book for you. There are steps in the book that are unclear, I had to frog 10 rows on my Lion because I realized I was doing it wrong. The whole pattern of putting the head together had instructions, however when it came to final assembly, it was basically, figure it out on your own. This book does not have detailed instructions on placement, how and where to attach hair, eyes, nose - shaping of features, it's all very basic instructions and then you are on your own. There are also a lot of references to other patterns so you are jumping around in the book a lot. For example, use this part of the Ram pattern to start the Zebra pattern.
